1 Polygonscan Blockchain

Blue Bird leverages the Polygonscan blockchain for its scalability, low transaction fees, and fast confirmation time. Polygon is a blockchain platform which aims to create a multi-chain blockchain system compatible with Ethereum. As with Ethereum, it uses a proof-of-stake consensus mechanism for processing transactions on-chain, ensuring an optimal user experience.

2 Consensus Mechanism

The consensus mechanism employed by Blue Bird is providing a robust and secure foundation for transaction validation and network integrity.

3 Smart Contracts

Smart contracts play a pivotal role in Blue Bird's ecosystem, automating processes within gaming, NFT creation, Staking, and Payment Gateway.
